

Guidelines for Poster Preparation

Presenters must be registered participants of the conference. Preparation, printing and transport of posters are the responsibility of the presenters.

The dimensions of your posters should not exceed 36"W x 59"H (90 cm x 150 cm), with minimum 1" margins on the top and bottom. It is suggested that you organize the poster in an orderly fashion for a logical flow from top to bottom and left to right. You might consider using the template provided by ICSI 2016 technical committee for adjustment and modification.

Formatting is at the discretion of the presenter; however, the poster should be easy to read from at least one meter away. Often with posters, "less is more." Minimizing written text by using bullet points or short phrases is effective. The judicious use of large and easily interpreted graphs, diagrams, and photographs often enhances the visual appeal of a poster while effectively conveying ideas.
